

Medha Swaraj

Bihar, India

+91-9693658552 • swarajmedha@gmail.com • swaraj608

Profile

Computer Science undergraduate (B.Tech, 6th Sem, 8.0 CGPA) with a focus on frontend development. Comfortable building responsive web applications using the MERN stack, with attention to clean UI and smooth user experience. Interested in creating practical, user-friendly interfaces and continuously improving frontend skills, with a growing curiosity in AI integration.

Education

Katihar Engineering College

Bachelor of Technology in Computer Science, CGPA: 8.0

Katihar, Bihar

2023 – 2027

Skills

Technical: HTML5, CSS3, JavaScript, TypeScript, React.js, Next.js, Node.js, Express.js, MongoDB, PostgreSQL, Tailwind CSS, Bootstrap, REST APIs, C, C++

Tools: Git, GitHub, VS Code, Postman

Certifications: Introduction to Cybersecurity [Cisco Networking Academy, June 2024]

Experience

EY Global Delivery Services & AICTE

Remote

Full-Stack Engineering Intern

Mar 2025 – Apr 2025

- Completed a 6-week intensive program focused on building modern web applications using the MERN Stack.
- Collaborated on the Next Gen Employability Program to architect scalable frontend and backend solutions.
- Applied Agile methodologies to deliver user-centric features while ensuring high standards of code performance.

AICTE & Edunet Foundation

Remote

Cyber Security Intern

May 2025 – Jun 2025

- Completed a 6-week intensive internship in collaboration with AICTE and IBM SkillsBuild, focusing on digital infrastructure security.
- Developed a Stegano-Logic Toolkit in Python to demonstrate data obfuscation by embedding hidden text within image carriers using LSB encoding.
- Implemented a security layer using password-based XOR logic and custom EOF markers to ensure data integrity and prevent unauthorized extraction.

Projects

E-commerce Website

Mar 2025 – Apr 2025

- Developed a functional web application to handle the end-to-end shopping experience, from product browsing to checkout.
- Engineered the backend with Node.js and Express.js, focusing on efficient product filtering and cart persistence.
- Integrated JWT authentication and administrative controls for secure product and inventory management.

Stegano-Logic Toolkit

May 2025 – Jun 2025

- Developed a security-focused tool that utilizes LSB (Least Significant Bit) encoding to embed hidden text within image carriers.
- Implemented a data obfuscation layer using password-based XOR logic to ensure the hidden message remains secure even if detected.
- Engineered the system to handle PNG files using bit-level manipulation to prevent data loss and maintain visual integrity.

Achievements

Youth Delegate | Viksit Bharat Youth Parliament | Patna Vidhan Sabha | March 2026
